1 Overview

CB Name and contact:	Control Union Certifications; Meeuwenlaan 4-6; P.O.Box 161, 8000AD Zwolle, Netherlands.
Primary contact for SBP:	Andrea Ferrazzo
Current report completion date:	22/Dec/2019
Report authors:	Mr. Lennart Holm (Lead Auditor) and Mr. Hubert Jurczynszyn (Certifier)
Name of the Company:	Canfor Energy North Limited Partnership – Chetwynd Operations
Company contact for SBP:	Brittany Burnett
Certified Supply Base:	TFL #48, Dawson Creek TSA, Fort St John TSA, Fort Nelson TSA, Mackenzie TSA, Prince George TSA, and West Central Alberta, FMA 8800025 and FMA 9900037
SBP Certificate Code:	SBP-06-25
Date of certificate issue:	27/02/2019
Date of certificate expiry:	26/02/2024

This report relates to the First Surveillance Audit

2 Scope of the evaluation and SBP certificate

Scope of evaluation: Surveillance audit to assess the CH's conformance to SBP standards 2, 4, and 5 and respective Instruction Notes and Documents. The evaluation included on-site visits to the pellet plant in Chetwynd, BC, Canada and the port facilities called Fibreco Export Inc. in North Vancouver, BC, Canada. The Organisation has been audited against PEFC Chain of Custody certificate, the certificate was issued on 14/05-2018.

Scope of certificate: The following SBP standards are applicable and form the scope of the evaluation and thus, the SBP certificate: Standard 2, Standard 4 and Standard 5. This certificate covers production and distribution of wood pellets, for use in energy production, at Canfor Energy North Limited Partnership – Chetwynd Operations, BC, Canada and rail transport to Fibreco Export Inc. for storage, aggregation, vessel loading and shipping of pellets. The scope of the certificate does not include a Supply Base Evaluation.

SBP certificate: SBP-06-25

3 Specific objective

The specific objective of this evaluation was to confirm that the Biomass Producer's management system is capable of ensuring that all requirements of the specified SBP Standards are implemented across the entire scope of certification. The scope of the evaluation covered:

- Review of the BP's management procedures;
- Review of the production processes, production site visit;
- Review of SBP system control points and an analysis of the existing PEFC CoC system;
- Interviews with responsible staff;
- Review of the records, calculations and conversion coefficients; and
- GHG data collection analysis - Instruction Document 5D: Dynamic Batch Sustainability Data v1.1 evaluation

4 SBP Standards utilised

4.1 SBP Standards utilised

Please select all SBP Standards used during this evaluation. All Standards can be accessed and downloaded from <https://sbp-cert.org/documents/standards-documents/standards>

- ☐ SBP Framework Standard 1: Feedstock Compliance Standard (Version 1.0, 26 March 2015)
- ☒ SBP Framework Standard 2: Verification of SBP-compliant Feedstock (Version 1.0, 26 March 2015)
- ☒ SBP Framework Standard 4: Chain of Custody (Version 1.0, 26 March 2015)
- ☒ SBP Framework Standard 5: Collection and Communication of Data (Version 1.0, 26 March 2015)

4.2 SBP-endorsed Regional Risk Assessment

Not applicable - No SBP endorsed Regional Risk Assessment was used for this assessment

5 Description of Company, Supply Base and Forest Management

5.1 Description of Company

Canfor Energy North Limited Partnership is partnership between Pacific Bioenergy Corporation and Canadian Forest Products Ltd (Canfor). Canfor Energy North Limited Partnership (CENLP) owns two pellets plants Canfor Energy North Limited Partnership Fort Saint John and Canfor Energy North Limited Partnership Chetwynd.

Canfor Energy North Limited Partnership – Chetwynd (4701 50th St. NW, Chetwynd, BC V0C 1J0) is a pellet plant, whereas the Canfor Energy North Limited Partnership corporate office activities are located at the pellet plant in Fort St. John. The plant receives Sawdust/shavings and Planer Chips directly from the Canfor Sawmill next door as well as by truck from other sawmills in the area. The pellet plant has 3 Andritz pellet presses and a pellet production capacity of approximately 125 000 mt/yr. The production started in Dec 28, 2015 and uses pine, spruce, fir. Sawdust and dry wood shavings and planer chips are 100% from soft wood and used to make 6 mm diameter pellets. The belt dryer uses heat from their CHP plant utilizing bark. The electricity of the CHP is used by CENLP-Chetwynd for pellet production and excess electricity is delivered to the Canfor Saw mill next door. The pellets are loaded on trains to be shipped to the external storage facility of Fibreco in the port Vancouver. The logistics of the pellets is handled by Pacific BioEnergy as an cargo agent. The pellets are stored at the Fibreco as part of the comingling agreement between Pacific BioEnergy and Fibreco and at Fibreco the sea going vessels are loaded. Canfor Energy North Limited Partnership only utilizes sawmill residuals. A large portion of the material can be traced back to sustainable Forest management system. Canfor Energy North Limited Partnership has a PEFC credit system to manage their Chain of Custody.

5.2 Description of Company's Supply Base

CENLP's feedstock comes exclusively from sawmill waste created in Canada. The primary input is received onsite from Canfor Corporation's Chetwynd sawmill (>40%) with some inputs from other Canfor sawmill facilities, West Fraser's Chetwynd Industries sawmill and minor inputs from other sawmills in Alberta from time to time (<15%). CENLP does not undertake harvesting activities.

The majority of forest management and harvesting within the Supply Base Area is conducted on Crown Lands which are owned and controlled by the province of British Columbia or Alberta. Harvesting of the crown lands in the British Columbia supply base is either conducted directly by the Province through their BC Timber Sales (BCTS) Program, or by companies which hold timber harvest licences issued by the Province. Harvesting of the crown lands in the Alberta supply base are done by companies which hold timber harvest licences issued by the Province. The log supply for Canfor's and West Fraser's sawmill originate from TFL #48, Dawson Creek TSA, Fort St John TSA, Fort Nelson TSA, Mackenzie TSA, Prince George TSA, and West Central Alberta, FMA 8800025 and FMA 9900037. The Timber harvesting licences can either be area-based licences or volume-based licences, with the management and harvesting rates being directly controlled by the Province's through Forest Legislation and Regulation. A minor component of logs delivered to the sawmills originate as purchase from private landowners clearing for agriculture/other purposes and from salvage from other industrial land clearing such as oil/gas companies or mining. A detailed description of the fibre supply areas for both British Columbia and Alberta can be found in the current timber supply

review documents which are located at (<https://www2.gov.bc.ca/gov/content/industry/forestry/managing-our-forest-resources/timber-supply-review-and-allowable-annual-cut>), (<https://www.agric.gov.ab.ca/app21/forestrypage?cat1=Forest%20Management&cat2=Forest%20Management%20Agreements&cat3=FMA%20Holders>).

CENLP uses primarily SPF residuals (Spruce/pine/balsam fir) with minor inputs of other coniferous species (black spruce). Occasionally there may be some hardwood species in the residuals where sawmills have milled species such as Aspen, cottonwood or paper birch. No softwood or hardwood species in British Columbia or Alberta are listed in CITES.

CENLP's feedstock is largely SBP-compliant (92% certified from 6 suppliers) as the residuals are transferred as certified under each supplier's PEFC™ Chain of Custody certificate. Any portion of the residuals transferred that is not PEFC™ certified is PEFC™ controlled (8% controlled from 2 suppliers) and has been screened through Canfor's PEFC™ due diligence system. The licensees who provide the residuals harvest timber from their certified forestlands and purchase some amount of logs from others certified or uncertified forestlands.

CENLP uses 100% secondary feedstock and does not procure any feedstock that is not PEFC™ certified or PEFC™ controlled.

The company's Supply Base Report can be found at https://www.canfor.com/docs/default-source/responsibility/supply-base-report-chetwynd-2019_new.pdf?sfvrsn=a4c8ee91_2

5.3 Detailed description of Supply Base

A quantative description of the company's supply base can be found at https://www.canfor.com/docs/default-source/responsibility/supply-base-report-chetwynd-2019_new.pdf?sfvrsn=a4c8ee91_2

Supply Base

- Total Supply Base area (ha): TFL #48, Dawson Creek TSA, Fort St John TSA, Fort Nelson TSA, Mackenzie TSA, Prince George TSA, and West Central Alberta, FMA 8800025 and FMA 9900037 - 33,406,058 ha.
- Tenure by type (ha): 100% all public tenures (Forest Licence, Tree Farm Licence, Woodlot Licences, Community Forests, Forest Management Agreements [Alberta], etc.).
- Forest by type (ha): 100% sub-boreal
- Forest by management type (ha): 100% managed natural forest
- Certified forest by scheme (ha): (e.g. hectares of FSC or PEFC-certified forest) Approximately 95% of the TSA's are SFI FM certified.

TSA/Mgmt Unit	TFL/FMA/FMU	Total Area (ha)	Licensee	Certification Type	Comments

	FMA 9900037	660,354	Canfor	SFI	

5.4 Chain of Custody system

The Organisation is holding valid PEFC Chain of Custody certificate system and the person responsible for implementing the PEFC Chain of Custody system and also manages the organizations SBP management system. The organization also verifies PEFC Controlled Sources through a DDS including a risk assessment covering British Columbia and Alberta. All wood fibre is tracked through the process from the District of Origin through the mill to the final bill of sale. The organization uses a database to gather and control information related to the feedstock such as supplier name, scale tickets, fibre type, certification, and district of origin. The organization has appropriate control mechanisms to calculate output volumes, claims and trademark/logo approval. The Organizations PEFC Chain of Custody system is based on the Volume Credit method, and all inputs to the production site are either received as XX% PEFC certified or sourced as PEFC Controlled Sources under the BP's PEFC Due Diligence System. All incoming feedstock is secondary and consists of sawdust, shavings, wood chips and hog. The organization has detailed and comprehensive procedures and databases to cover the necessary requirements regarding the SBP-approved Chain of Custody system.

6 Evaluation process

6.1 Timing of evaluation activities

The audit occurred on November 15 and 28-29, 2019 by the Control Union auditor. This report is the result of the findings of a certification evaluation carried out by an independent lead auditor and team of auditors representing Control Union Certifications. The purpose of the assessment was to evaluate the compliance of the client with respect to the standards used within the scope of the certificate

Activity	Date/time	Location	Executed by (role)
Preparation (telephone/email on scope and planning)	01/08/2019 1.5 hours	Remote	Hubert Jurczyszyn (certifier)
Audit			
Opening meeting	15/11/2019 09:30-09:45	Fibreco	Lennart Holm (lead auditor)
Visit Port operations	09:45-12:30	Fibreco	Lennart Holm
Introduction into Supply Base and management system overview. Review of documents and records, Supply Base Report	28/11/2019 09:00 – 12:00	CENLP-Fort St.John	Lennart Holm
Review of COC system/procedures, interview responsible personnel	13:00 – 15:00	CENLP-Fort St.John	Lennart Holm
Interviews key personnel purchase and sales	15:00 – 18:00	CENLP-Fort St.John	Lennart Holm
Tour of the facilities	29/11/2019 09:00 – 10:00	CENLP-Chetwynd	Lennart Holm
GHG paper audit and evidence review	10:00 – 16:00	CENLP-Chetwynd	Lennart Holm
Business integrity, social, health and safety requirements. Logo/Trademark use	16:00 – 17:30	CENLP-Chetwynd	Lennart Holm
Closing Meeting	17:30- 18:00	CENLP-Chetwynd	Lennart Holm
Report writing	22/12/2019	Remote	Lennart Holm

6.2 Description of evaluation activities

The audit consisted of an opening meeting, during which the scope was confirmed. The auditor also explained the methods to be employed during the audit.

After this introduction, all relevant requirements of the applicable SBP standard(s) were verified on compliance through the use of a report template and checklists.

The audit was completed by filling in the audit report and discussing the audit results. During this closing meeting it was also discussed how evidence can be submitted of corrective action with respect to non-conformities that were identified during the audit.

1. Names and affiliations of people interviewed	
Name:	Affiliation:
Tammy Lukoni	Pacific BioEnergy
Brittany Burnett	Canfor Energy North Limited Partnership
Sheldon Wheeler	Canfor Energy North Limited Partnership
Glen Warkentin	Canfor Energy North Limited Partnership
Franco Antoniazzi	Canfor Energy North Limited Partnership
Jimmy Bodreau	Canfor Energy North Limited Partnership-Chetwynd
Mike Hynd	Canfor Energy North Limited Partnership-Chetwynd
Michael Ritter	Canfor Energy North Limited Partnership-Chetwynd
Mikayla Dykes	Canfor Energy North Limited Partnership-Chetwynd
Chris Hann	Canfor Energy North Limited Partnership-Chetwynd
Jamie Ganger	Canfor Energy North Limited Partnership-Chetwynd
Logan Pruden	Canfor Energy North Limited Partnership-Chetwynd
Barb Eddy	Canfor Energy North Limited Partnership-Chetwynd
Steve Anderson	Canfor Energy North Limited Partnership-Chetwynd
Ray Louie	Fibreco

2. Critical control points, summary	
<i>Identified CCP</i>	<i>Evaluation CCP</i>
Sourcing and input check	Check prior to sending the material by supplier and check upon request

Reception and storage	Reception and storage of material based on PEFC Volume Credit Method.
Volume control	PEFC Volume Credit Method, with x% PEFC certified input material
Labelling	Trademark agreement has not been signed. Risk of unauthorized trademark use.
Invoicing and shipping	No sales to date. Certified materials are either SBP Controlled or SBP Compliant

6.3 Process for consultation with stakeholders

Consultation with stakeholders' was conducted by Control Union on October 9, 2018, with a final date for submitting comments on November 19, 2018.

The process for stakeholder consultation consisted of sending direct email to different stakeholder categories: state institutions, local NGOs, authorities, government bodies, forest owners associations, academic and research institutions.

No stakeholder comment was received.

7 Results

7.1 Main strengths and weaknesses

The audit of CENLP demonstrated a good level of compliance with the required criteria of Standard 2, 4 and 5. There was reasonable evidence provided to support compliance where a Non-Conformity was not detected. The Non-Conformities presented in this report identify actions that must be taken in order to comply with the SBP system and its standards. The existence of a PEFC Chain of Custody system is considered a main strength with respect to CENLP 's overall conformity with the relevant SBP standards. The company is also GGL certified.

Weaknesses: Non conformities identified in this audit.

7.2 Rigour of Supply Base Evaluation

N/A, no SBE in the scope of the certificate.

7.3 Collection and Communication of Data

The organization has in depth procedures for this in depth procedures for this. The auditor confirmed the Greenhouse Gas (GHG) sources for feedstock input from the forest, production at the facility, transportation to the port and storage and handling at the port and reviewed how the input data was measured. Findings were substantiated by on-site staff interviews with operations personnel on the overview of the operations at the facility, historical operations, changes to operations, procedures and processes used to maintain the facility, and procedures and processes used to ensure data quality. CENLP demonstrated full competency to analyse and report the required data on Greenhouse Gas emissions

7.4 Competency of involved personnel

The company has one person who has the main responsibility related to the SBP system. All personnel that is involved with SBP have received appropriate training whereby all relevant procedures and requirements have been covered. All training and instructions are based on the procedures as identified in company manuals, and training is provided by internal resources and recorded accordingly. Key personnel showed good knowledge of SBP requirements.

7.5 Stakeholder feedback

See 6.3 above.

7.6 Preconditions

N/A, no preconditions.

8 Review of Company's Risk Assessments

Describe how the Certification Body assessed risk for the Indicators. Summarise the CB's final risk ratings in Table 1, together with the Company's final risk ratings. Default for each indicator is 'Low', click on the rating to change. Note: this summary should show the risk ratings before AND after the SVP has been performed and after any mitigation measures have been implemented.

Not applicable

9 Review of Company's mitigation measures

Not applicable. No SBE in the scope of the certificate.

10 Non-conformities and observations

Identify all non-conformities and observations raised/closed during the evaluation (a tabular format below may be used here). Please use as many copies of the table as needed. For each, give details to include at least the following:

- applicable requirement(s)
- grading of the non-conformity (major or minor) or observation with supporting rationale
- timeframe for resolution of the non-conformity
- a statement as to whether the non-conformity is likely to impact upon the integrity of the affected SBP-certified products and the credibility of the SBP trademarks.

Main Evaluation

NC number 2018-01	NC Grading: Minor
Standard & Requirement:	Standard 2: 7.1
Description of Non-conformance and Related Evidence:	
The BP shall prepare a Supply Base Report (SBR) which shall be made readily accessible on the BP's website. Commercially sensitive and confidential information may be excluded from the SBR. Supply base report is made in English but is not yet uploaded and available on the company's website.	
Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date
Evidence Provided by Company to close NC:	https://www.canfor.com/products/energy/pellets
Findings for Evaluation of Evidence:	Uploaded the SBP certificates and SBR report to Canfor's public website on January 09/2019. NC Closed
NC Status:	Closed

NC number 2018-02	NC Grading: Minor
Standard & Requirement:	Standard 2: Instruction Note 2C, 1.1
Description of Non-conformance and Related Evidence:	

The BP shall prepare a SBR which is publicly available and includes a summary of any SBE. Supply base report is prepared but is not yet uploaded and available on the company's website, thus not publically available. A SBE in the scope of the certificate.	
Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date
Evidence Provided by Company to close NC:	https://www.canfor.com/products/energy/pellets
Findings for Evaluation of Evidence:	Uploaded the SBP certificates and SBR report to Canfor's public website on January 09/2019. NC Closed
NC Status:	Closed

NC number 2018-03	NC Grading: Minor
Standard & Requirement:	Standard 4: 6.3.2
Description of Non-conformance and Related Evidence:	
The legal owner shall determine and implement effective arrangements against corruption, proportionate to the nature and the scale of organisation. The company has not determined nor implemented anti-corruption procedures.	
Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date
Evidence Provided by Company to close NC:	Canfor Code of Conduct_2019_FINAL
Findings for Evaluation of Evidence:	The company has these procedures/requirements identified in the company's Code of Ethics. Document was not provided to CB at the time of audit hence the non-conformity. Document is available on the server and available to all employees.
NC Status:	Closed

NC number 2018-04	NC Grading: Major
Standard & Requirement:	Standard 4: 5.5.1

Description of Non-conformance and Related Evidence:	
No SBP on-product trademark use is permitted. Trademark agreement has not been signed. Risk of unauthorized trademark use.	
Timeline for Conformance:	Prior to (re)certification
Evidence Provided by Company to close NC:	Signed licence agreement was provided on 31/12/2018
Findings for Evaluation of Evidence:	MAJOR NC Closed
NC Status:	Closed

NC number 2018-05	NC Grading: Major
Standard & Requirement:	Std 4, Instruction Note 4B, 1.1/1.2
Description of Non-conformance and Related Evidence:	
The Sustainable Biomass Partnership (SBP) owns three registered trademarks: the SBP logo artwork, the initials "SBP" and the name "Sustainable Biomass Partnership". In order to use the SBP trademarks, the organisation shall have signed the SBP trademark licence agreement.. Trademark agreement has not been signed. Risk of unauthorized trademark use.	
Timeline for Conformance:	Prior to (re)certification
Evidence Provided by Company to close NC:	Signed licence agreement was provided on 31/12/2018
Findings for Evaluation of Evidence:	MAJOR NC Closed
NC Status:	Closed

NC number 2018-06	NC Grading: Minor
Standard & Requirement:	Standard 5: 8.1/8.2
Description of Non-conformance and Related Evidence:	

Each BP is required to publish a publicly available Supply Base Report (SBR). The requirements for this report are set out in SBP Standard 2: Verification of SBP-compliant Feedstock.

Supply base report is prepared but is not yet uploaded and available on the company's website, thus not publically available.

Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date
Evidence Provided by Company to close NC:	https://www.canfor.com/products/energy/pellets
Findings for Evaluation of Evidence:	Uploaded the SBP certificates and SBR report to Canfor's public website on January 09/2019. NC Closed
NC Status:	Closed

First Surveillance

NC number 2019-01	NC Grading: Minor
Standard & Requirement:	Std 2, 5.1
Description of Non-conformance and Related Evidence:	
Canfor Energy North Limited Partnership Chetwynd's Supply Base is the interior of British Columbia and north western Alberta, Canada and is made up of Fort St John TSA, Dawson Creek TSA, Prince George TSA, Fort Nelson TSA, MacKenzie TSA, TFL # 48 in Dawson Creek, west central Alberta. However, the organization has not filled in section "2.1 Description of the Supply Base" according to guidelines given in the template for Supply Base Reports (SBR). Guideline indications are: "Provide a general description of the supply base within the regional context including country of harvest. Include a comparison of the scale of harvesting compared to other forest based industries in the region. Provide a general description of the forest resources (land use and ownership status, socio-economic conditions, forest composition, profile of adjacent lands). The description must include a description of the forestry management practices or land management practices used and the presence of any CITES or IUCN species. Include an overview of the proportions of SBP feedstock product groups (Controlled Feedstock, SBP-compliant Primary Feedstock, SBP-compliant Secondary Feedstock, SBP-compliant Tertiary Feedstock, SBP non-compliant Feedstock) showing the proportions of each which are certified and uncertified. Provide an indication of the number of suppliers for each SBP feedstock product group. Include species mix.	
Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date
Evidence Provided by Company to close NC:	<i>Click or tap here to enter description provided by Company to close the NC.</i>

Findings for Evaluation of Evidence:	<i>Click or tap here to enter findings for evaluation of evidence by the auditor.</i>
NC Status:	Open

NC number 2019-02	NC Grading: Minor
Standard & Requirement:	Std 4, 5.3.3
Description of Non-conformance and Related Evidence:	
Only one production site for this BP but the PEFC credit account in CENLP_Volume Credit Account_2019.xls is shared between two sites, Fort St John and Chetwynd, thus are not site specific for SBP calculation including data of inputs and outputs.	
Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date
Evidence Provided by Company to close NC:	<i>Click or tap here to enter description provided by Company to close the NC.</i>
Findings for Evaluation of Evidence:	<i>Click or tap here to enter findings for evaluation of evidence by the auditor.</i>
NC Status:	Open

NC number 2019-03	NC Grading: Minor
Standard & Requirement:	Std 4, 1,1/1,2
Description of Non-conformance and Related Evidence:	
Trademark licence agreement was signed on 20/12/2018. SUSTAINABLE BIOMASS PROGRAM (SBP) and Sustainable Biomass Program (SBP) used on https://www.canfor.com/products/energy/pellets , without approval as specified in the document "SBP certification mark and trade mark use Guidance for Certificate Holders".	
Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date

Evidence Provided by Company to close NC:	<i>Click or tap here to enter description provided by Company to close the NC.</i>
Findings for Evaluation of Evidence:	<i>Click or tap here to enter findings for evaluation of evidence by the auditor.</i>
NC Status:	Open

NC number 2019-04	NC Grading: Minor
Standard & Requirement:	ID5D, 1,1
Description of Non-conformance and Related Evidence:	
"Feedstock is recorded into LIMS upon delivery. Each month, the feedstock is compiled into the CENLP_Chetwynd_Audit Data_2019.xls, and transferred into tab ID5D, where feedstock is identified as CAT 5 NL Biomass Sustainability Regulation. The Maximum accounting period is 12 Months as per Canfor Energy North Limited Partnership Chetwynd PEFC COC system. The system explaining how feedstock may be allocated to biomass as Dynamic Batch Sustainability Data (DBS) is not well described in Canfor Energy North Limited Partnership Chetwynd management system. "	
Timeline for Conformance:	By the next surveillance audit, but no later than 12 months from report finalisation date
