1 Overview

Producer name: Skeena Bioenergy

Producer location: 5402 Highway 16W, Terrace, British Columbia V8G 0C6

Geographic position: Lat E/W 54 degrees 31 minutes, Long N/S -128 degrees 38 minutes

Primary contact: Nathan Bond, nathan.bond@skeenasawmills.com

Company website: <http://skeenasawmills.com/bioenergy/>

Date report finalised: 17/Mar/2019

Close of last CB audit: 07/Mar/2019

Name of CB: NEPCon Certifying ApS

Translations from English: NA

SBP Standard(s) used: Standard 2 V1.0, Standard 4 V1.0, Standard 5 V1.0

Weblink to Standard(s) used: <https://sbp-cert.org/documents/standards-documents/standards>

SBP Endorsed Regional Risk Assessment: Not Applicable

Weblink to SBE on Company website: Not Applicable

2 Description of the Supply Base

2.1 General description

Skeena Bioenergy produces wood pellets at its facility located in Terrace, British Columbia. Skeena Bioenergy's Fibre Procurement operations currently include the purchase and transport of residual fibre. Majority of Skeena Bioenergy's wood fibre is from suppliers that maintain Chain of Custody Certification that includes fibre from certified forest management landbase, however, a portion of fibre is controlled.

100% of the fibre procured by Skeena Bioenergy is secondary fibre, which is residual material or bi-products from the lumber sawmill in the form of bark, sawdust, shavings and hog. 90% of the fibre procured by Skeena Bioenergy is forest management certified and also accompanied by chain of custody claim certificates and therefore is classified by Skeena Bioenergy as SBP-compliant secondary feedstock. Other secondary fibre is either purchased with a Programme for the Endorsement of Forest Certification (PEFC) controlled sources claim from certified suppliers, or purchased through Skeena Bioenergy's own certified Chain of Custody/Due Dilligence System through risk assessments prepared to verify that the risk of the non-certified fibre being from controversial sources.

Overview of Supply Base – Skeena Bioenergy

Certified Supply Base			Un-Certified Supply Base
TSA: Bulkley, GBR North, Kalum, Kispiox, Nass	SFI		TSA: Bulkley, Cassiar, GBR North, Kalum, Kispiox, Nass, Cascadia, Pacific
Forest licence: FLA16882, FLA16885	SFI		Forest licence: not identified
Tree Farm Licence: 41	SFI		Tree Farm Licence: 1

Supply Base Area – Skeena Bioenergy¹

All forests are classified within the Temperate Conifer Forest region and none of the forest types include classified CITES or IUCN species. Certain fauna and plant species are listed as either endangered or threatened in the supply base by federal and provincial sources. Forest operations are bound by provincial and federal legislation associated with forestry practices including listed species at risk. This legal framework is enforced to prevent and deter illegal harvesting within protected areas and unadapted practices associated with species at risk habitat².

¹ Data Source: Generalized Forest Cover Ownership – <https://catalogue.data.gov.bc.ca/dataset/generalized-forest-cover-ownership>

² <http://www.registrelep-sararegistry.gc.ca> - <https://www.for.gov.bc.ca/> - <https://www2.gov.bc.ca/>

Currently Skeena Bioenergy only supplier is the Skeena Sawmills Ltd. In the future, suppliers may include wood fibre from the Supply Base Area, all from North/Central Coast and Interior of British Columbia.

On public lands (Crown – CAD) Natural resources, Clean Water and Endangered Species legislation, specific to the forest industry includes, but is not limited to Forest Act and Forest and Range Practices Act (FRPA) in BC and associated regulations regarding the granting and regulation of harvesting rights and the marking, scaling and transportation of timber/fibre, as well as the planning, harvesting, reforestation, and environmental protection on Crown and State Lands. In addition to legislation, regional land use plans with legally established objectives must be followed within Forest Stewardship Plans (BC) and Woodlot Licence Plans and subsequent cutting permits and/or transport documents.

Enforcement of natural resources legislation is supported by the Province's Compliance & Enforcement Agency, under the Ministry of Forests Lands and Natural Resource Operations and Rural Development (FLNRORD). In addition, the Provincial Forest Practices Board conducts independent audits and investigations.

For Federal Lands, Natural resources legislation through federal Species at Risk Act (BC and Canada), CITES, the provincial Timber Marking and Transport Regulations, provincial labour and health legislation, and applicable enforcement agencies address forest activities.

On private lands, harvesting on is legislated through the Private Managed Forest Land Act (PMFLA) in BC. Further legislation is provided through the federal Species at Risk Act (BC), CITES (CAD, BC), the provincial Timber Marking and Transport Regulations, provincial labour and health legislation. Forest activities are regulated/monitored for conformance and alleged non-compliance via the Managed Forest Council in BC.

2.2 Actions taken to promote certification amongst feedstock supplier

Forest certification is a fundamental part of the forestry industry in BC due to customer demand for certified wood products. Majority of Skeena Bioenergy's input is from secondary feedstock from suppliers that hold forest management (CSA Z809 FM/SFI®-FM) certification and PEFC™ chain of custody certification to either SFI or PEFC. When entering into a purchase agreement with minor suppliers who are non-certified, Skeena Bioenergy provides a Wood Producer Information package, which contains information promoting certification and Best Management Practices.

2.3 Final harvest sampling programme

No primary fibre has been harvested to date and Skeena Bioenergy does not anticipate harvesting primary fibre; however, in the future, if primary fibre will be a source of feedstock, a risk assessment will be conducted, with opportunity for field inspections based on the specified risk, to determine harvest sampling percentages based on SBP standards and the risk associated with harvesting the area.

2.4 Flow diagram of feedstock inputs showing feedstock type

2.5 Quantification of the Supply Base

Supply Base³

- a. Total Supply Base area (ha): cumulative area of all forest types within SB – **24 271 271 ha**
- b. Tenure by type (ha): privately owned/public/community concession

- i. Crown Land: **23 879 049 ha**
- ii. Federal Land: **50 479 ha**
- iii. Private Land: **341 259 ha**
- iv. Unknown: **483 ha**

NOTE: Within the above listed 'tenure type' – the following protected areas exist:

- i. BC Parks, Protected Areas, Ecoreserves – **3 447 294 ha**
- ii. NGO Conservation Areas (Fee Simple Properties) – **1 357 ha**
- iii. Conservancy Areas: **2 381 492 ha**
- iv. Conservation Lands: **145 588 ha**

- c. Forest by type (ha):

- I. Biome:

- i. Boreal Forests/Taiga → **10 098 765 ha**
- ii. Temperate Coniferous → **10 601 176 ha**
- iii. Tundra → **2 519 524 ha**

- II. Ecoregions:

- i. Alaska-St. Elias Range tundra: **468 790 ha**
- ii. British Columbia mainland coastal forests: **7 293 133 ha**
- iii. Cascade Mountains leeward forests: **116 012 ha**
- iv. Central British Columbia Mountain forests: **185 047 ha**
- v. Fraser Plateau and Basin complex: **627 031 ha**
- vi. Northern Cordillera forests: **9 524 715 ha**
- vii. Northern Pacific coastal forests: **1.8 ha**
- viii. Northern transitional alpine forests: **2 379 951 ha**
- ix. Pacific Coastal Mountain icefields and tundra: **2 050 735 ha**
- x. Yukon Interior dry forests: **574 051 ha**
- xi. Rock and Ice: **929 070 ha**

- d. Forest by management type (ha): plantation/managed natural/natural – **100% natural managed forests**

³ Data Source: Generalized Forest Cover Ownership – <https://catalogue.data.gov.bc.ca/dataset/generalized-forest-cover-ownership>

e. Certified forest by scheme⁴ (ha): (e.g. hectares of FSC or PEFC-certified forest)

i. TSAs within the SBA

TSA	Certification	Non-certified (%)	Certified (%)
Bulkley TSA	SFI	29.42	70.58
Cassiar TSA	SFI	98.15	1.85
GBR North TSA	SFI	33.26	66.74
Kalum TSA	SFI	73.03	26.97
Kispiox TSA	SFI	76.61	23.39
Nass TSA	SFI	65.57	34.43
Cascadia	SFI	Not available	Not available
Pacific	SFI	Not available	Not available

ii. TFL Certification within SBA

TFL #	Certification	Company	Non-Certified (%)	Certified (%)
TFL1	-	-	0.00	0.00
TFL41	SFI	Skeena Sawmills Ltd.	0.00	100.00

Timber Supply Area (TSA) and Timber Farm License (TFL) are two processes managed by the provincial government to grant timber access to the forest industry plants. The TSA designations ensure BC Timber Sales has sufficient allowable annual cut allocation. The TFL grants exclusive rights to harvest timber and manage and conserve forest resources within a defined area of land.

Feedstock

- a. Total volume of Feedstock: **90,000 ODTs**
- b. Volume of primary feedstock: **0 tonnes**
- c. List percentage of primary feedstock (g), by the following categories.
 - Certified to an SBP-approved Forest Management Scheme – **0%**
 - Not certified to an SBP-approved Forest Management Scheme – **0%**
- d. List all species in primary feedstock, including scientific name
 - Western Hemlock – *Tsuga heterophylla*
 - Mountain Hemlock (*Tsuga mertensiana*)
 - Amabilis Fir – *Abies amabilis*
 - Subalpine Fir – *Abies lasiocarpa*
 - Hybrid White Spruce – *Picea glauca x engelmannii*
 - Engelmann Spruce – *Picea engelmannii*
 - Sitka Spruce – *Picea sitchensis*
 - White Spruce – *Picea glauca*
 - Lodgepole Pine – *Pinus contorta*
 - Western Red Cedar – *Thuja plicata*
 - Yellow Cedar – *Chameocyparis nootkatensis*
- e. Volume of primary feedstock from primary forest – **0%**
- f. List percentage of primary feedstock from primary forest (j), by the following categories. Subdivide by SBP-approved Forest Management Schemes:
 - Primary feedstock from primary forest certified to an SBP-approved Forest Management Scheme – **0%**
 - Primary feedstock from primary forest not certified to an SBP-approved Forest Management Scheme – **0%**
- g. Volume of secondary feedstock:
 - Origin of secondary feedstock: **North/Central Coast and Interior of British Columbia**
 - Type: **Sawmill residuals, sawdust, bark, shavings and hog**
 - Percentage of volume: **80 – 100% sawmill waste from the supply base area**
- h. Volume of tertiary feedstock: **0%**

3 Requirement for a Supply Base Evaluation

SBE completed	SBE not completed
☐	X

Not applicable at this time as all material is secondary feedstock and considered as PEFC Controlled Sources or 100% PEFC Certified.

4 Supply Base Evaluation

4.1 Scope

N/A

4.2 Justification

N/A

4.3 Results of Risk Assessment

N/A

4.4 Results of Supplier Verification Programme

N/A

4.5 Conclusion

N/A

N/A

11 Review of Report

11.1 Peer review

A peer review was completed prior to the finalization of the SBR. The draft SBR, as well as the CoC Procedures, were reviewed to ensure the SBR was thorough and comprehensive. Recommendations were provided to add clarity to the SBR. Nicolas Blanchette, ing.f. from INCOS Strategies completed the External Peer Review. Nicolas Blanchette is an experienced independent natural resource professional, providing services in the areas of Certification (Forest Management and Chain of Custody) Auditing, Regulatory Compliance, Standards and Procedures Development and Implementation. Nicolas Blanchette is a Quebec Registered Professional Forester (ing.f.) with work experience in multiple Canadian provinces.

11.2 Public or additional reviews
